

Are you a self-motivated, enthusiastic, service minded and looking for an exciting career? Want to become part of a team in a stable industry providing vital services to the public and the environment? We invite you to apply and discuss if have the right skills and attitude to become a part of our family at Envirolink. Envirolink operates, maintains, and manages water, wastewater, and public works services to governmental and private clients. At Envirolink, we employ numerous skilled personnel from labors, operators, mechanics, technicians, customer service specialist, equipment operators, etc. We provide a robust training program and professional development program allowing you to put your skills to work as we serve the public. Qualified candidates will be placed on an eligibility list for openings based on experience and demonstrated skills.

Service Technician - Operations

We are looking for individuals with a keen skill in math, biology, and chemistry with a high mechanical aptitude. Key knowledge and skills vital to our operations personnel include knowledge of treatment processes for water and sewer treatment systems, knowledge of water and sewer regulations, safety practices, ability to conduct field inspections, ability to apply Asset Management concepts including preventive maintenance programs, asset inventory, condition assessments, criticality analysis, failure analysis, and budgeting. The right individual is a critical thinker with the ability to diagnose situations and apply their knowledge to ensure production of the highest quality product. Attention to detail and the ability to “effectively” communicate with the public, between departments and with state and federal officials is a key function. Successful candidates can push through challenges to achieve the desired outcomes in a timely manner.

Candidates should be self-motivated with a desire to be part of a team that works together to accomplish the mission. Members should have strong leadership, communication, and interpersonal skills.
